

Pro Access Concrete Raised Floor Systems

Pro Access Steel Concrete Raised Floor Systems are manufactured to a high quality specification using rigidly applied production procedures and are tested to CISC standards with a class "A" flame spread rating. Panels are made of high-grade steel and filled with lightweight concrete, giving them core strength providing excellent rigidity, durability, stability with industry leading load performance.

Applications

With three standard load models complete interchangeability with our Hollow Steel system, these panels coupled with an extensive selection of understructure supports and floor finishes are suitable for a wide range of applications from typical data/computer centers, server / telecommunication rooms, mission critical facilities, assembly areas, and general purpose office and equipment applications.

Floor Finishes

Concrete Raised Floor Systems are available in several [Floor Finishes](#) including [High Pressure Laminate](#), Vinyl, and bare steel painted finish that is suitable for carpet or rubber installation in general office applications.

Floor Understructure

Concrete Systems are available with Bolted Stringer and Corner Lock systems which can accommodate floor heights as low as 3" and as high as 30".

Bolted Stringer
